Marya Tawfik

Full Stack Developer

mariyatawfik6@gmail.com 0988944313 Adama , Ethiopia LinkedIn GitHub

SKILLS

Full-Stack — React JS, Node.js, Express.js, Tailwind CSS, Gin
Programming Languages — Python, C++, JavaScript, TypeScript, Golang
Databases — MySQL, PostgreSQL, MongoDB
AI & Machine Learning — RAG (Retrieval-Augmented Generation)
Soft Skills — Communication, Teamwork & Collaboration, Problem Solving, Time Management, Agile Development

EDUCATION

B.Sc. in Computer Science and Engineering 09/2024 – 07/2029
Adama Science and Technology University (ASTU) Adama, Ethiopia
- Relevant coursework: Database Management Systems, Design and Analysis of Algorithms, Data Structures, Object-Oriented Programming (OOP)

Competitive Programming and Coding Academy 12/2025 – 10/2026
A2SV — Africa to Silicon Valley - Backed By Google Adama, Ethiopia
built a strong foundation in data structures and algorithms (Solved 400+ problems on LeetCode and Codeforces) and gained hands-on experience in backend development.

PROFESSIONAL EXPERIENCE

Software Engineering Intern 06/2026 – 09/2026
Backend Engineer — SRA Hub Platform Adama, Ethiopia
- Architected authentication platform from ground up—13 production REST endpoints serving 10+ dependent domains; engineered secure Google OAuth 2.0 with ticket-exchange pattern, eliminating token-leakage vulnerabilities and reducing signup friction.
- Hardened API against 9+ threat categories through defense-in-depth: rate limiting, CORS, security headers, input validation, and error sanitization—established authentication as a trusted security boundary for the entire platform.
- Owned security posture end-to-end with comprehensive threat modeling and test coverage, reducing authentication-related incidents to zero.

PROJECTS

Smart Campus — AI-Powered Academic Assistant 01/2026
React 19, FastAPI, LangChain, ChromaDB, MongoDB
- ***Collaborated in a team*** to build a full-stack academic research platform, driving the integration between the React 19 frontend and FastAPI backend across **10+ endpoints**.
- Architected the hybrid vector/lexical search engine (ChromaDB + MongoDB), improving context retrieval recall by **25%** for PDFs over **100+ pages**.
- Built real-time UI components over WebSockets and optimized parallel LLM inference calls, cutting end-to-end response streaming latency to **<1.2s**.

Library Management System 09/2025 – 10/2025
Node.js, Express.js, MongoDB, Mongoose, JWT, Cloudinary
- **Co-developed** a full-stack platform, playing a major role in server-side architecture and building **15+ REST endpoints** handling **500+ concurrent user sessions** with **<120ms** latency.
- Architected JWT/bcrypt RBAC middleware, enforcing **100% token validation** across Student/Admin routes to prevent unauthorized access.
- Built an automated Nodemailer pipeline for **3 alert triggers** and Cloudinary payment uploads, cutting manual admin overhead by **~80%**.

PrimeCommerce — Multi-Tier E-Commerce Platform 03/2026 – 04/2026
React 19, Three.js, Node.js, Tailwind CSS, Recharts, Chapa
- **Co-developed** a dual-app e-commerce system (Storefront & Admin), building modular React 19 UI state and filtering across **1,000+ catalog items**.
- Developed real-time sales analytics dashboards using Recharts to visualize finance metrics and inventory queues with sub-**100ms** re-renders.
- Optimized client-side bundles via Vite code-splitting, delivering **60 FPS** Three.js 3D renderings and integrating Chapa payments for **500+ SKUs**.
